-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9, 10, 13-17, 21, 23, 25-28 and 33-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sapporo Breweries (Jap. Pat. No. 6197749) ("Sapporo") in view of Szlavko (Jnl. of Amer. Soc. of Brewing Chemists, 34 (2) pp. 59-60, 1976) for the reasons set forth in the last Office action.

Response to Arguments

Applicants' arguments filed 05/16/04 have been fully considered but they are not persuasive.

Applicants argue that Sapporo does not teach the use of beads. While the patent and its machine translation (herein attached) do not use the term "bead" in connection with the method by which the yeast are fixed, it is clear that beads are in fact produced and used. On page 2, in the example, of the translation, the yeast are immobilized in cells after the yeast and gelling material are expelled from a double pipe.

Applicants also argue that the use of non-flocculant yeast results in benefits not appreciated by the prior art. In response to applicants' argument, the fact that applicants have recognized another advantage which would flow naturally from following the

suggestion of the prior art cannot be the basis for patentability when the differences would otherwise be obvious. See *Ex parte Obiaya*, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985).

Lastly, applicants assert that the improvements obtained by using non-flocculant yeast are shown by the specification's data. It appears from the data, that the asserted benefits are obtained from two specific strains of non-flocculant yeast, i.e., NA-3 and NA-4. The claims are not commensurate in scope for the use of these two yeasts, e.g., the claims are not enabled for providing the asserted benefits for any and all non-flocculant yeast.
